Description

Just imagine the convenience of charging your phone with no wires. Well, that is exactly what the Mi Powerbank Wireless is all about. You get the freedom of charging your phone with no inconvenient cables to get in the way. This means you can put both the powerbank and your phone in the same pocket and charge on-the-go. With a 10000mAh capacity you will not be looking for a socket any time soon.

Specifications

It's all the goodness of the tried and tested Xiaomi powerbank with the added convenience of wireless charging. The Mi Wireless Powerbank is able to fast-charge through a wired cable, but also uses the top face as a wireless charging pad with speedy charging enabled. You get the best of both worlds! The finish on the mat is rubber, meaning you can put both the powerbank and your wireless charging enabled phone in the same pocket and enjoy cable-free charging on-the-go.
